

Flavors & Colors

GOLD COAST
ingredients, inc.®

Company Profile

Gold Coast Ingredients (GCI), Inc. was founded in 1985 by James A. Sgro in Southern California with the vision of delivering flavors made from the finest ingredients available, while providing the highest quality of customer service in the industry.

Over 35 years later that original vision still holds true. GCI remains committed to providing the finest flavors and food ingredients at an excellent value and fair price, delivered with service that is unsurpassed in promptness, courtesy and consistency. Our full line of flavors and colors are formulated for each industry's unique requirements.

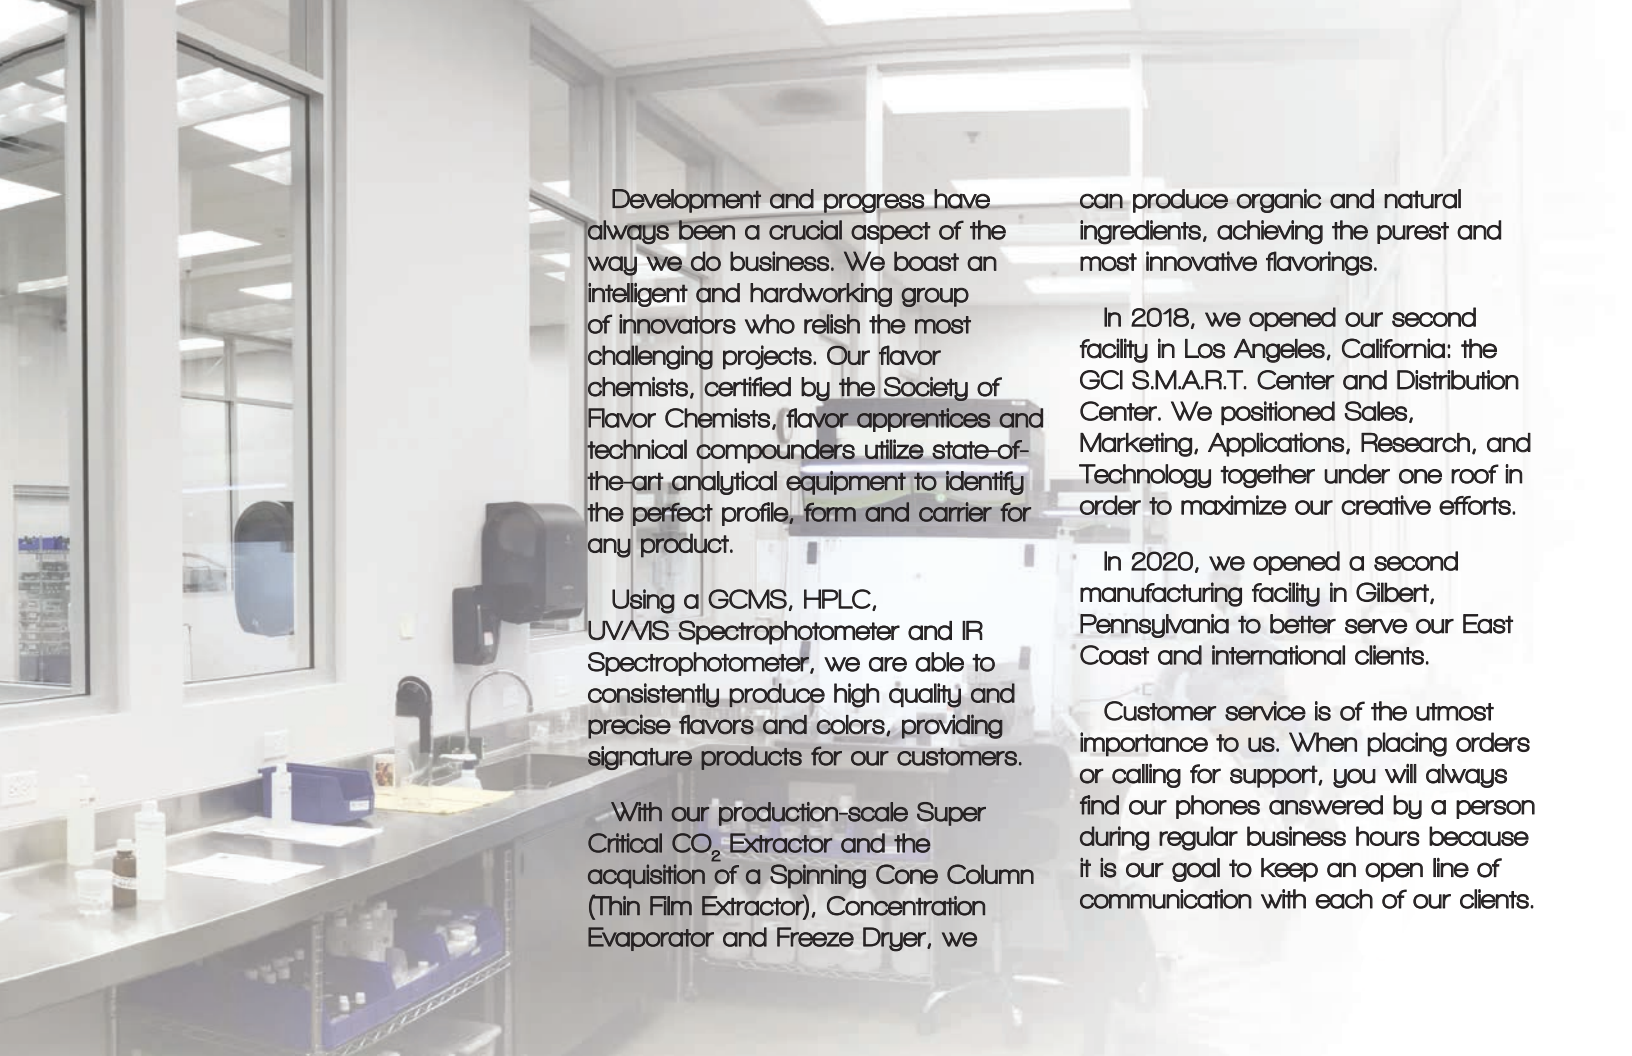

At GCI, we take enormous pride in our products and the way we do business. We are a QAI certified company, manufacturing products at the highest worldwide standards.

We also offer custom formulation, OU and KOF-K kosher certified flavors, as well as ISA certified halal flavors upon request.

In 1993, our company transitioned its role as solely a domestic American manufacturer into an international supplier, capable of fulfilling requests in any country. Our advanced manufacturing techniques and export knowledge allow us to accommodate businesses worldwide, producing flavor orders of any volume. Our manufacturing hubs are located in Commerce, California and Gilbert, Pennsylvania, and we utilize distribution subsidiaries throughout the world.

We service businesses in over 50 countries and depending on our customer's location, we supply our liquid, powder, spray-dried, emulsions and advanced natural extraction flavorings.

Development and progress have always been a crucial aspect of the way we do business. We boast an intelligent and hardworking group of innovators who relish the most challenging projects. Our flavor chemists, certified by the Society of Flavor Chemists, flavor apprentices and technical compounders utilize state-of-the-art analytical equipment to identify the perfect profile, form and carrier for any product.

Using a GCMS, HPLC, UV/VIS Spectrophotometer and IR Spectrophotometer, we are able to consistently produce high quality and precise flavors and colors, providing signature products for our customers.

With our production-scale Super Critical CO₂ Extractor and the acquisition of a Spinning Cone Column (Thin Film Extractor), Concentration Evaporator and Freeze Dryer, we

can produce organic and natural ingredients, achieving the purest and most innovative flavorings.

In 2018, we opened our second facility in Los Angeles, California: the GCI S.M.A.R.T. Center and Distribution Center. We positioned Sales, Marketing, Applications, Research, and Technology together under one roof in order to maximize our creative efforts.

In 2020, we opened a second manufacturing facility in Gilbert, Pennsylvania to better serve our East Coast and international clients.

Customer service is of the utmost importance to us. When placing orders or calling for support, you will always find our phones answered by a person during regular business hours because it is our goal to keep an open line of communication with each of our clients.

Vegetarian Savory Flavors

Gold Coast's technical savory department continues to innovate and push boundaries in the world of savory and umami flavors.

Savory and/or reaction flavors are the result of heating proteins or amino acids with sugars for a specific temperature and time. An intimate understanding of the complex Maillard reaction gives us the ability to naturally create vegetarian flavors such as beef, pork, poultry and seafood, as well as complex chocolates and caramels.

Our 100% vegetarian flavors duplicate the taste of meat and poultry without the use of animal proteins or animal products. These natural flavors come in powder and liquid form, and can be made organic, non-GMO, gluten-free or MSG-free upon request. Our savory flavors taste great in marinades, seasonings, gravy bases, demi-glaces, brines and in stews, sauces or soups.

Certified Organic

Certified Organic means that a non-profit, state or private certification organization, accredited by the United States Department of Agriculture (USDA), has verified that products labeled as organic meet strictly defined organic standards.

Our organic products are certified by Quality Assurance International (QAI), which also meets international (IFOAM) standards of organic accreditation. This assures that the client is receiving a traceable, reliable product from origin to plate.

Vanilla

Vanilla is one of the most universally recognized and utilized flavors worldwide. From crème brulee to ice cream and cake batters, many products exhibit vanilla's unique, subtle and delicious characteristics. One of the special qualities of vanilla is its ability to help blend different flavors and make them compatible.

Gold Coast formulates various vanilla flavor profiles including Madagascar, French, Mexican, Tahitian and West Indian vanilla for our flavorings and extracts.

Location combined with regional curing processes distinctly influences the predominant characteristics of vanilla beans. Our knowledge of these geographical factors and the science of flavor creation allows our team to manufacture complex and innovative vanilla flavors and extracts for our customers.

Synthetic Colors

From ripe yellows and greens to vibrant red and blue hues, color invites us, warns us and even influences perception of strength. Gold Coast Ingredients offers custom blends of powder and liquid FD&C and Lake Dyes for all industries to help make products consistently look as good as they taste.

Natural & Organic Colors

GCI colors with nature, using a select inventory of natural & organic colorants available in powder and liquid forms.

Alfalfa	Caramel
Annatto	Carmines
Annatto Turmeric	Grape Skin Extract
Beet	Green
Beet Juice	Orange
Beta Carotene	Red
Brown	Turmeric Extract
Blue	Yellow

All of Gold Coast Ingredients colors are sold solely as color blends or can be formulated inside one of our flavors.

Flavor & Color Facts

Our flavors are available in liquid, powder or spray dried form, and formulated as natural, organic, non-GMO, natural & artificial or artificial. Custom formulation, kosher and halal certified flavors are available upon request.

All of our liquid products are available in quarts, single gallons, five gallon pails and fifty-five gallon drums. Powders are available in twenty-five pound boxes, fifty pound boxes, one hundred pound boxes and two hundred pound drums.

Powders or Liquids

Although each of us may have a personal preference in this never-ending debate, we'd like to provide some specific points to help you decide which flavor is easier or better to use. In different applications there definitely are some advantages or disadvantages.

For dry mix manufacturing, powders certainly provide easy scaling, low water content and general disbursement by dry blending. In non-dry mixes, oil or water based liquids can provide easy disbursement and volume measuring. To some, liquid is favorable since most flavor components begin in a liquid form.

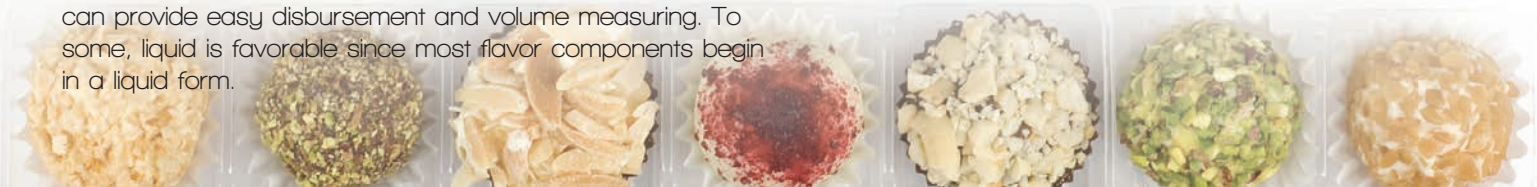

What is Value?

Value means much more than a low price and it should be more than just getting what you pay for. Our company is dedicated to providing unfailing quality at a competitive price with performance when and where you need it most.

A product priced cheaper does not always mean better value. Sometimes a few cents more per batch can yield a superior finished product resulting in greater customer satisfaction. Never the less, always examine the quality, the performance and the true end price which is determined by your usage level.

Non-GMO

For consumers who are mindful of genetically modified organisms (GMOs), Gold Coast Ingredients offers non-GMO flavors upon request. We define non-GMO flavors as flavors that do not contain detectable genetically modified proteins nor are they derived from genetically modified sources.

Flavor & Color Facts

Natural Flavors W.O.N.F.

W.O.N.F. stands for: With Other Natural Flavors. W.O.N.F. flavors can be a method of obtaining the best value in natural flavors. Direct concentrates of some of the more delicate or subtle flavors like Blueberry, Strawberry or Raspberry can get quite expensive and require special handling.

W.O.N.F. flavors obtain a naturally stronger flavor without the use of artificial enhancers - providing you with the luxury of "all natural" in flavoring your product.

Concentrated Flavors

Concentrated is considered many times stronger than an average strength product. (Note: other than pure vanilla extract and pure oils, there are no government specifications regulating how a company may determine or evaluate a strength or level of concentration.)

For example, a gallon of tenfold vanilla will flavor as much product as ten gallons of single fold vanilla. A gallon of eighteen fold vanilla equals eighteen gallons of single fold

vanilla in flavoring potential.

We at Gold Coast Ingredients are dedicated to providing you with the exact flavor you need for your product.

Definitions

Artificial

A product whose components are derived from synthetic process.

Extract

A flavor whose predominant solvent is alcohol.

Emulsion

A flavor whose components have been dispersed and encapsulated in either a gum or starch suspension.

Flavor

A product that gives taste or enhances flavor in an existing product, other than flavor oils, essences and botanicals. It may contain water, propylene glycol, alcohol, etc.

Natural & Artificial

A blend that combines both synthetic and natural products.

Natural, Natural W.O.N.F.

A product in which all flavoring components come from natural sources.

Organic

USDA-NOP certified organic compliant flavors.

Spray-Dried

A uniform encapsulated flavor system that offers extended shelf stability.

W.O.N.F.

A natural flavor that has been enhanced with other natural flavors.
